

HELP

Thank you for purchasing "Modern Style Presentation" through Envato.
This project file can be used in Premiere Pro CC 2019 and later. No Plugins required.

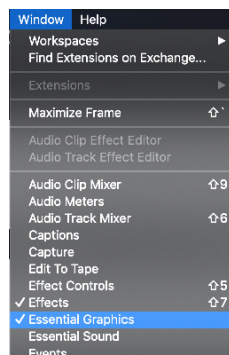

.....

It's really easy to customized:

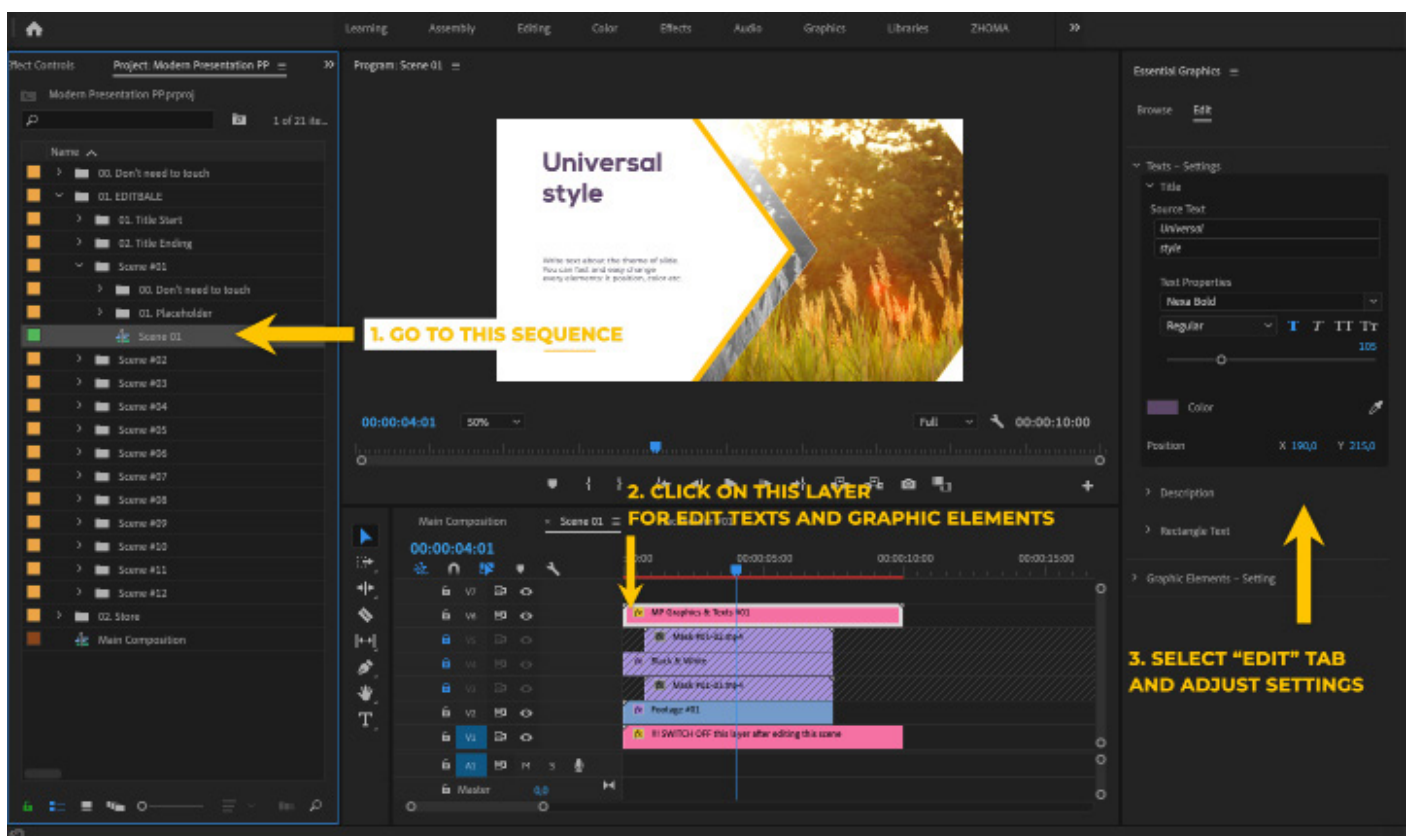

1. Set the font used. You can find here free version: <https://www.fontsquirrel.com/fonts/montserrat> & <https://www.fontsquirrel.com/fonts/nexa>

2. Drag all your footages in a folder "02. Store Media".

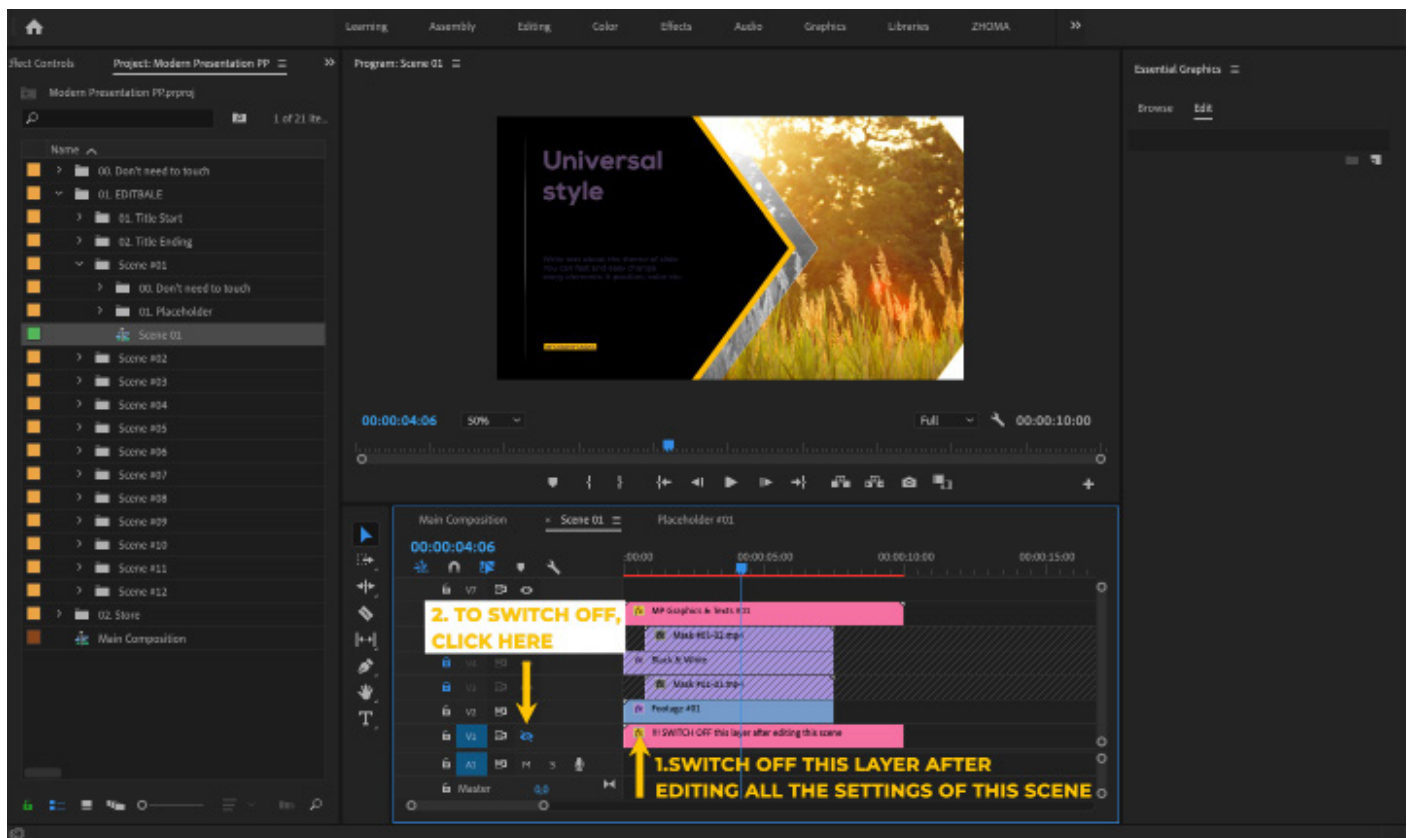

3. Open "Essential Graphics" (from window tab). It's necessary to adjust the graphic elements.

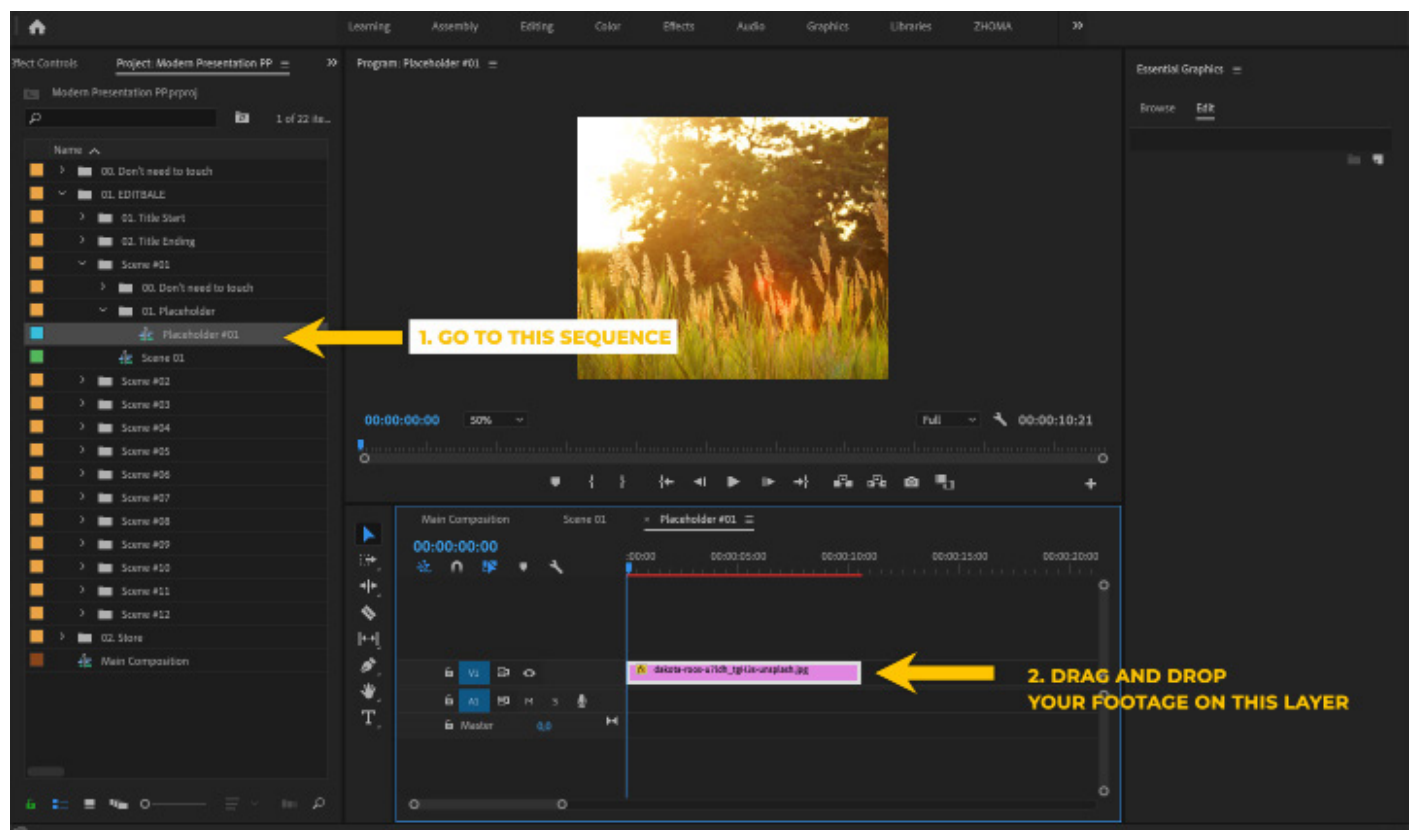

4. Open "Scene #..." sequence. Here, edit texts and adjust settings.
Click on the "MP Graphics & Texts #..." for it.

5. Since the background of the scene should remain transparent, switch off this layer after editing the texts. To set the background color, go to the "Main composition", click on the "MP Background" layer and select a color.

6. Next, open "Placeholder #..." sequence and place your footages for screen.

7. Do these steps for all scenes.

8. Add sound - Open "Main Composition" sequence, and place your music file here.

NOTE. If you want to move the project file to another location, put the same "Motion Graphics Template Media" and "Assets" folder there or use the project Project Manager (in the Premiere Pro) to collect file.

Export to get the final result.

I recommended .MOV and format option H264. You get good quality and relatively small size.

.....

I've used font - "Montserrat" & "Nexa".

You can find here free version: <https://www.fontsquirrel.com/fonts/montserrat>

<https://www.fontsquirrel.com/fonts/nexa>

Soundtrack you can find here: <https://audiojungle.net/item/hip-hop/23367711>

.....

Thats all!

If you have any questions or need help customizing the project -
write me an email via my profile page.

I hope you enjoy! I wish you good luck and all good!

.....

Best regards, Imocean.
